

St. Joseph Ministries Architectural Stained Glass
Creation of Stained Glass Peacock Panel
Spring 2013

WINTER PARK CANCER CENTER

Finished Pattern

Glass Cutting Begins

Blues and Oranges...

More colors of glass added

Painted line work defines the “eyes” of peacock feathers

Glass pieces must fit pattern perfectly

The pattern is filling in...

More pieces added...

All glass for feathers has been cut and placed..

Painting of "eyes" begins

Painting of the peacock body

Peacock "eyes" checked
before kiln-firing the paint

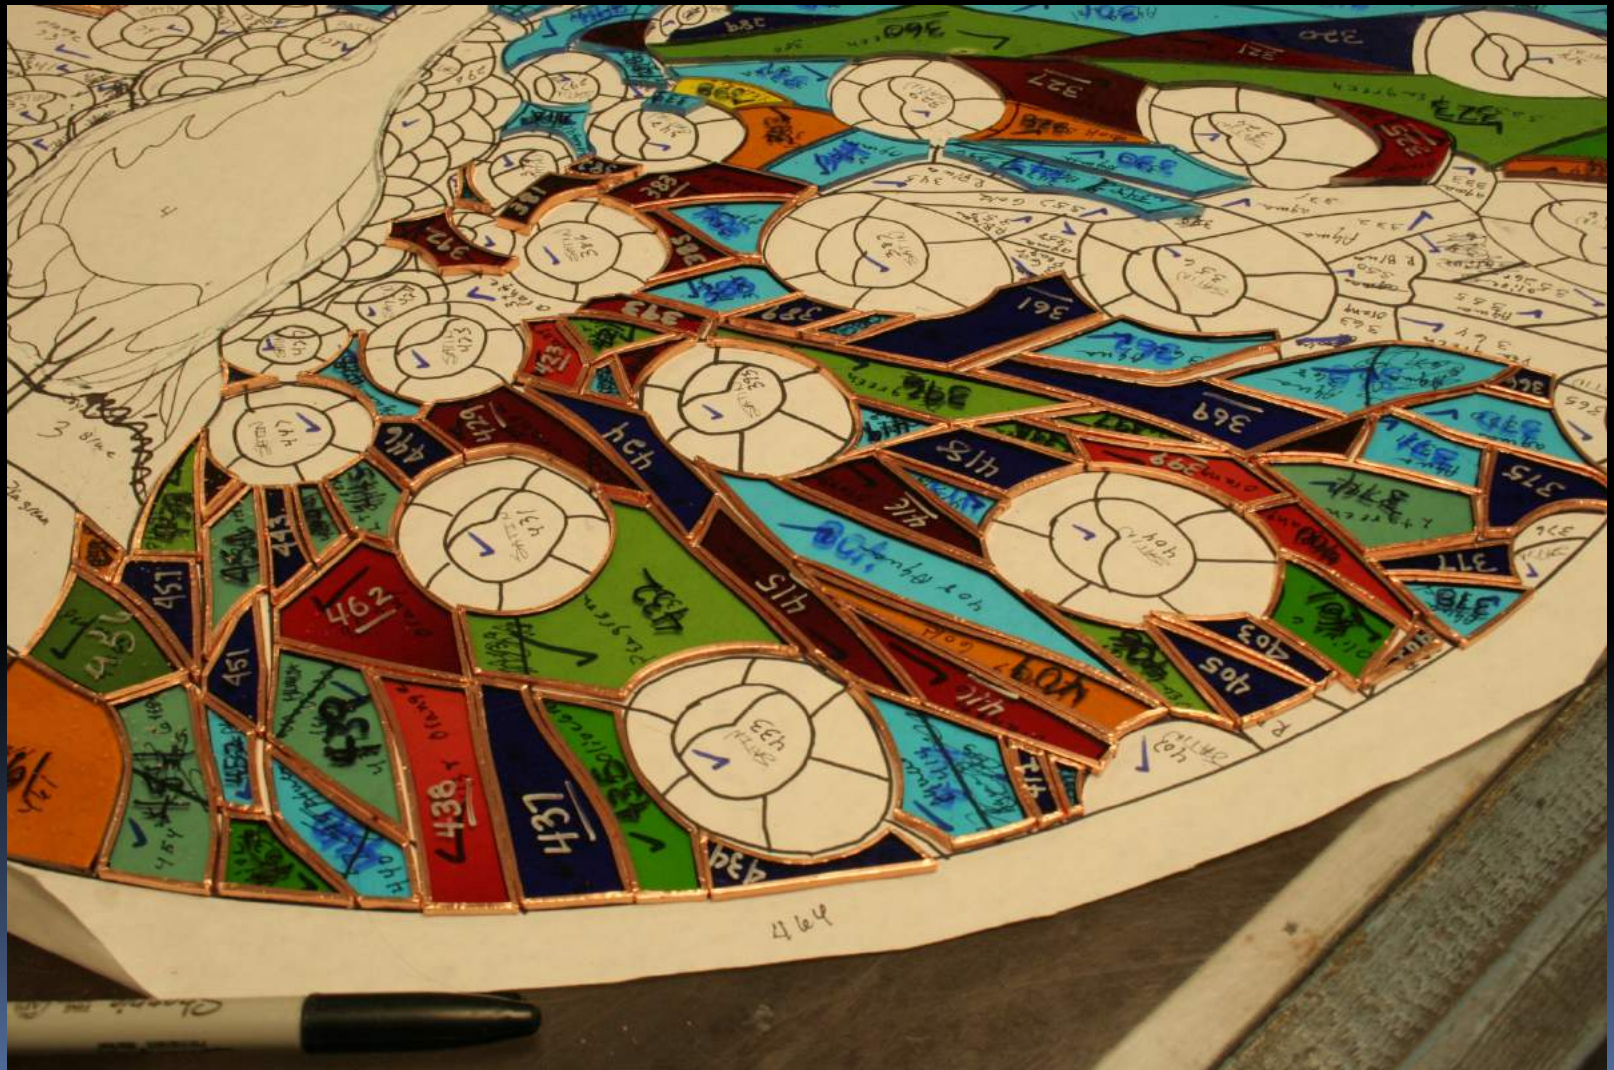

The "eyes" are removed from the kiln...
beautiful colors!

Copper foiling begins..

Each tiny piece must be foiled then re-fitted

Copper foiling almost complete

The painted eyes are added

The WPCC nameplate is fitted

All the pieces are laid out

Tack soldering begins

Tack-soldered segment close-up

Sister Diane
continues to
tack solder

Tack soldering complete

Full soldering in process

Soldered piece examined before
leading the edge

Final piece — ready to install
